25 kN

$8 \leq \varnothing \leq 13 \text{ mm}$

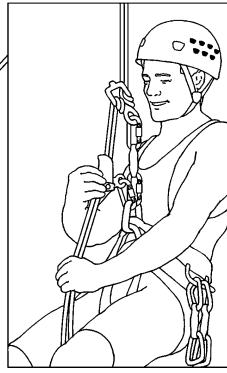

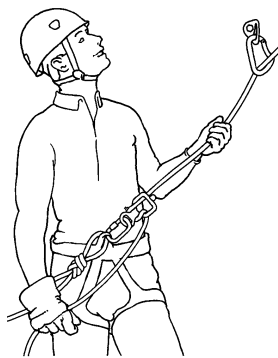

(EN) Rope (core + sheath) static, semi-static (EN 1891) or dynamic (EN 892)

(FR) Corde (âme + gaine) statique, semi-statique (EN 1891) ou dynamique (EN 892)

(DE) Seil (Kern + Mantel) statisch, halbstatisch (EN 1891) oder dynamisch (EN 892)

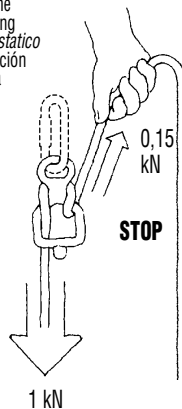

(IT) Corda (anima + calza) statica, semistatica (EN 1891) o dinamica (EN 892)

(ES) Cuerda (alma + funda) estática, semiestática (EN 1891) o dinámica (EN 892)

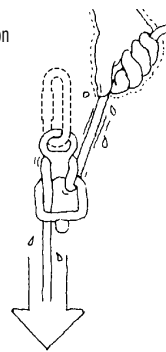

Static load

Sollicitation statique
Statische Belastung
Carico statico
Solicitud estática

Dynamic load

Sollicitation dynamique
Sturzttest
Carico dinamico
Solicitud dinámica

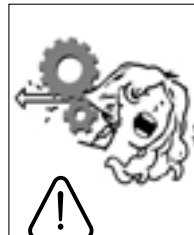

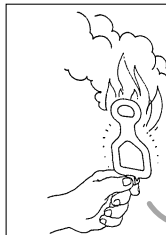

Maximum shock load 2 – 3 kN, but at the risk of substantial rope-slip, with burning of the hands and possibility of letting go in a heavy fall.

Force choc maxi 2 – 3 kN mais risque de glissement important de la corde avec brûlure de la main et lâcher de corde pour les chutes importantes.

Maximaler Fangstoß 2 – 3 kN, aber bei großen Stürzen starkes Durchrutschen des Seiles und Verbrennen der Hände und somit Risiko des Auslassens.

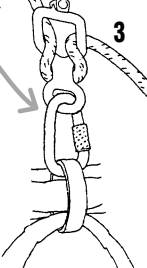

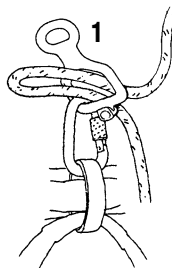

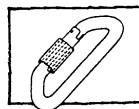

Forza di arresto massima di 2 – 3 kN. Nelle forti cadute si ha un notevole scorrimento della corda, con rischio di bruciatura della mano e conseguente abbandono della presa sulla corda.

Fuerza de choque máxima 2 – 3 kN, pero con riesgo de deslizamiento importante de la cuerda, quemaduras en la mano y la posibilidad de soltar la cuerda en caídas importantes.
